

**Chattanooga State Community College
Nuclear Medicine Technology Program
Leesa Ross, MA, CNMT, PET, RT(N)(CT)**

Chattanooga State Community College's Nuclear Medicine Technology Program currently has 5 students scheduled to graduate August 1, 2017. The students are located in Chattanooga, TN; Jackson, TN; and Huntsville, AL. The students have been very active this year within the profession, while also taking the time to participate in community service activities. They performed fund raising by selling RADA Cutlery in order for them to attend the Nuclear Medicine Technologist of Tennessee (NMTT) meeting and Student Registry Review Workshop April 7-9, 2017 in Knoxville, TN.

Each year the NMTT accepts poster submissions from each of the schools in Tennessee. Prizes are awarded for first, second and third place. This year, it is the hope that Chattanooga State students will be selected to present and possibly win either a presentation or poster award.

The program continues to evolve and stay current utilizing technology. The program has become an online program with students only coming on campus for exams and labs once a month. It is taught synchronous and asynchronous. The students seem to enjoy it and actually are more interactive in the live online classes than in a traditional classroom. The program is also in the process of adding an associate degree track in hopes of accepting the first class in spring of 2018.

For more information regarding the program, please contact Leesa Ross at (423) 697-3331 or Dusty York at (423) 697-3335.
