

The UAB Master of Science in Nuclear Medicine Technology – entry level – program continues its implementation of our new degree with our first cohort of students. Four full time and one part-time student began the program in the Fall 2016 term. The four full time students are expected to graduate in December 2017. In addition, the UAB MSNMT program has a shared curriculum with the new Master of Science in Health Physics program which began this past Fall 2016 term as well. This program has three part time students. The image included shows these students in our inverse square law concept lab.

Knowledge that will change your world
