

Update from UMMC NMT

All graduates in the class of 2016 passed the ARRT(N) and CNMT exams and were thrilled to secure full-time NMT positions. This cohort was our last to graduate with a post-baccalaureate certificate. Last year, UMMC NMT completed the process of becoming a Master of Science degree program. In May 2017, our five NMT students will receive the inaugural UMMC Master of Science in Nuclear Medicine Technology degree. These students are busy preparing for the registry examinations and will present their research abstract, *A Student Investigation of SIRT in the Treatment of Nonresectable Hepatocellular Carcinoma*, at the SWC SNMMI annual meeting in Houston, Texas. They are also eagerly scheduling employment interviews. Two students are fortunate to have already secured full-time positions following graduation. We will interview applicants for the Class of 2018 in mid-April.

The MSNMT Class of 2017: Tyler Johnson, Mary Hooper Mason, Alex Noah, Victoria Hardwick, and Rischer Williams. The Program Director is Sherry J. West.
